

Sea Energy Agriculture.

Maynard Murray was a medical doctor who researched the crucial importance of minerals – especially trace elements – to plants and animals. Beginning in

1938 and continuing throughout the 1950's, Dr. Murray used sea solids – mineral salts remaining after water is evaporated from ocean water – as fertilizer on a variety of vegetables, fruits and grains.

His extensive experiments demonstrated repeatedly and conclusively that plants fertilized with sea solids and animals fed with sea-solid-fertilized feeds grow stronger and more resistant to disease.

Sea Energy Agriculture recounts Murray's experiments and presents his astounding conclusions. The work of this eco-ag pioneer was largely ignored during his lifetime, and his book became a lost classic – out of print for over 25 years. Now this rare volume is once again available, with a new foreword and afterword by the founder of *Acres U.S.A.*, Charles Walters.

OceanSolution™ Benefits.

**Will replace all fertilizers
from seed to full growth
for less than \$7.00 per
acre!**

Increased Yields

Plant Vigor

**Pest and Disease
Resistance**

Longer Shelf Life

Superior taste

**Higher Nutritional
Content & Value**

**Allowable for Organic
Cultivation (OCIA & JAS)**

OceanGrown Canada Ltd.

OceanSolution™

Nature's Balanced Nutrients
for Plant, Farm and
Hydroponics.

What is OceanSolution™

OceanSolution™ is a concentrated liquid solution that provides essential nutrients from the deep ocean for healthy seed

and plant growth – perfect for farms, orchards, pastures, hydroponics and home gardens. The following benefits of using sea solids have been summarized by Dr. Maynard Murray in his groundbreaking work *Sea Energy Agriculture*

- Tomatoes contain approximately 56 minerals while conventionally grown tomatoes contain less than 10 minerals
- Corn contains approximately 18 minerals, wheat and oats 36 minerals, apples, peaches and other fruits over 30 minerals
- The need for dangerous and costly pesticide is reduced due to a stronger plant immune system and enhanced disease resistance
- Open-pollinating seeds do not require additional nutrient supplementation
- Demonstrated ability to rehabilitate diseased or under-performing orchards and pastures
- Enhanced nutritional content and extended shelf life of crops when compared to those grown with conventional nutrient products

Unlike conventional dry plant nourishments, OceanSolution™ contains aerobic bacteria considered by many to be essential for healthy plants and soil. And according to consumer tests, OceanGrown™ produce tastes better than conventionally grown produce.

**New Book by Charles Walters.
Founder of Acres USA.**

The Advantages of OceanSolution™

Don Jansen has been using pure ocean water to feed plants for over 20 years, continuing the pioneering work of Dr. Maynard Murray. Dr. Murray's book, *Sea Energy Agriculture*, published in 1976, was largely ignored. This book recounts Dr. Murray's experiments and presents his incredible findings. Recently, *Acres U.S.A.* picked up the cause and published an interview with Don Jansen in Sept. 2003. Since that interview, the interest in, and use of Dr. Murray's and Don Jansen's *Sea Energy Agriculture* has skyrocketed.

The Results being experienced worldwide are stunning:

- **Increased yields**
- **Plant vigor**
- **Pest and disease resistance**
- **Longer shelf-life**
- **Superior taste**
- **Higher nutritional content & value**

The ocean is the only source where most of the known elements are in a perfectly balanced solution.
