HELP YOUR CROPS GROW WITH THE POWER OF THE OCEAN

Ideal for
AGRICULTURE
LANDSCAPING
HYDROPONIC
HOME & GARDEN

Ocean Grown contains all 90 naturally occurring mineral elements! Growers of all kinds can now instantly deliver the perfect balance of nutrients to every plant.

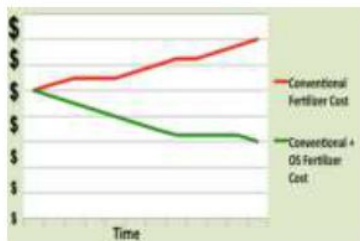

- Restores depleted soils
- Boosts nutritional values
- Enhances flavor drastically
- Liquid for lightening fast absorption
- Concentrated - making it cost efficient
- 100% Organic
- Eliminates the use of toxic chemicals COMPLETELY

Ocean Grown dilutes 1 to 100 saving you tons of money on fertilizer and has no shelf life!

Ocean Grown dilutes 1 to 100 saving you tons of money on fertilizer and has no shelf life!

N-P-K COST SAVINGS

Crops require less macro-nutrients when there is a solid mineral foundation.

With & without

The ocean is the only source where most of the known elements are in a perfectly balanced solution.

Until now, soil and hydroponics growers have normally used fertilizers and nutrient solutions based on only three major elements: nitrogen, phosphorus, and potassium (NPK).

The solution PURE contains 90+ elements in an inorganic crystalloid solution ready to be absorbed by a plant's roots.

Before and after

Maynard Murray was a medical doctor who researched the crucial importance of minerals – especially trace elements – to plants and animals.

Beginning in 1938 and continuing throughout the 1950's, Dr. Murray used sea solids – mineral salts remaining after water is evaporated from ocean water – as fertilizer on a variety of vegetables, fruits and grains.

His extensive experiments demonstrated repeatedly and conclusively that plants fertilized with sea solids and animals fed with sea-solid fertilized feeds grow stronger and more resistant to disease.

Murray's experiments provided astounding conclusions.
