

# NEWS FROM THE GARDEN #2

Official Newsletter of OceanGrown Canada

HELP YOUR CROPS GROW WITH  
THE POWER OF THE OCEAN

Ideal for

- **AGRICULTURE**
- **LANDSCAPING**
- **HYDROPONIC**
- **HOME & GARDEN**

Ocean Grown contains all 90 naturally occurring mineral elements! Growers of all kinds can now instantly deliver the perfect balance of nutrients to every plant.

## *This is a journey started a long time ago*

Maynard Murray was a medical doctor who researched the crucial importance of minerals – especially trace elements – to plants and animals.

Beginning in 1938 and continuing throughout the 1950's, Dr. Murray used sea solids – mineral salts remaining after water is evaporated from ocean water – as fertilizer on a variety of vegetables, fruits and grains.

His extensive experiments demonstrated repeatedly and conclusively that plants fertilized with sea solids and animals fed with sea-solid fertilized feeds grow stronger and more resistant to disease.

- **Restores depleted soils**
- **Boosts nutritional values**
- **Enhances flavor drastically**
- **Liquid for lightening fast absorption**
- **Concentrated - making it cost efficient**
- **100% Organic**
- **Eliminates the use of toxic chemicals COMPLETELY**

*Ocean Grown dilutes 1 to 100 saving you tons of money on fertilizer and has no shelf life!*

With & without

**N-P-K Cost Savings**

Crops require less macro-nutrients when there is a solid mineral foundation.

The ocean is the only source where most of the known elements are in a perfectly balanced solution.

Until now, soil and hydroponics growers have normally used fertilizers and nutrient solutions based on only three major elements: nitrogen, phosphorus, and potassium (NPK).
